

NAVARAJ THAPA

QA Engineer · Test Automation & Software Quality

navaraj.thapa@email.com | (555) 345-6789 | linkedin.com/in/navarajthapa | github.com/navarajthapa | Kathmandu, Nepal

PROFESSIONAL SUMMARY

Recent BSCS graduate from Westcliff University with a concentration in Artificial Intelligence and a keen eye for software quality. Brings a systematic, detail-obsessed approach to manual and automated testing — passionate about breaking things so end users never have to. Comfortable working independently on deep exploratory testing tasks and contributing precise, well-documented bug reports that developers can act on immediately. Seeks a QA role where thoroughness and craftsmanship are valued over speed.

EDUCATION

Bachelor of Science in Computer Science · Concentration: Artificial Intelligence

2021 – 2025

Westcliff University · GPA: 3.6 / 4.0 · Dean's List

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL, Bash

Test Automation: Selenium WebDriver, Playwright, Cypress, Appium, TestNG, JUnit, pytest

API Testing: Postman, REST Assured, Newman, Swagger/OpenAPI

Performance: JMeter, Locust, k6

CI/CD & DevOps: Jenkins, GitHub Actions, Docker, Git, Jira, TestRail, Zephyr

AI-Assisted QA: ML-based anomaly detection, automated log analysis, test case generation with LLMs

Databases: PostgreSQL, MySQL, MongoDB — query writing for data validation

Methodologies: Agile/Scrum, BDD (Gherkin/Cucumber), TDD, Risk-Based Testing, Exploratory Testing

SOFT SKILLS

Attention to Detail · Naturally notices inconsistencies, edge cases, and UI misalignments that others overlook. **Analytical Thinking** · Methodically traces bugs to root cause rather than surface symptoms. **Written Communication** · Writes precise, reproducible bug reports with clear steps, expected vs. actual behaviour, and severity assessments. **Deep Focus** · Thrives in long exploratory testing sessions requiring sustained concentration. **Self-Directed** · Proactively identifies test coverage gaps and builds test cases without waiting to be asked. **Reliability** · Consistently delivers thorough test cycles on time; teammates can count on quality sign-offs. **Patience** · Comfortable running repetitive regression cycles and investigating intermittent failures with calm persistence.

EXPERIENCE

QA Engineering Intern · SoftTest Labs · Remote

Jun 2024 – Dec 2024

- Designed and maintained a Selenium + pytest automation suite covering 300+ test cases for a SaaS web application.
- Identified and reported 80+ bugs during exploratory testing; 95% were confirmed and resolved before release.
- Integrated automated tests into GitHub Actions CI pipeline, reducing regression cycle time from 2 days to 3 hours.
- Performed API testing with Postman and REST Assured, validating response schemas, status codes, and data integrity.
- Collaborated with developers and PMs in Agile sprints to refine acceptance criteria and write BDD Gherkin scenarios.
- Conducted load testing with JMeter, uncovering a DB connection bottleneck that caused failures above 500 concurrent users.

PROJECTS

HotelEase – Hotel Reservation System QA Suite | *Python · Selenium · pytest · Postman*

- Developed a full regression test suite for the HotelEase PHP-based reservation system covering booking, auth, and admin flows.
- Automated 60+ UI tests with Selenium WebDriver and validated all REST endpoints with Postman collections.
- Documented test plans, test cases, and defect reports in TestRail; achieved 95% functional coverage before deployment.

AI Test Case Generator | *Python · OpenAI API · pytest*

- Built a tool that takes a feature description and auto-generates pytest test stubs using the GPT API, cutting test-writing time by 50%.
- Integrated with GitHub Actions to suggest new test cases whenever a PR modifies core business logic files.

NepalChat – QA & Reliability Contribution | *Python · FastAPI · Locust*

- Contributed performance and integration testing for the NepalChat bilingual chatbot project.
- Ran load tests simulating 1 000 concurrent users with Locust; identified memory leak causing 40% latency spike under load.

CERTIFICATIONS & AWARDS

- ISTQB Certified Tester – Foundation Level (2024)
- Udemy – Selenium WebDriver with Python (2023)
- Postman Student Expert Certification (2023)
- Westcliff University – Dean's List, All Semesters (2021–2025)
